Worker’s Compensation  5849
Medical Staff Office  2311/5999

ALL EMERGENCY CODES “88”

RIGHT TO KNOW

Employees have a right to know about any hazardous materials in their workplace and environment. Material Safety Data Sheets (MSDS) contain information related to safe practices when working with hazardous materials. If hazardous materials are kept in your workplace, MSDSs are available using the intranet under employee resources. T

MSDSs contain:
1. Hazards of chemicals used in the workplace.
2. Prevention & protection methods.
4. PPE & disposal methods.
5. Physical properties of the product.
6. Product name & manufacturer.

SECURITY

Security is staffed 24 hours per day, at least 2 officers per shift. Security incidents or suspicious activities can be reported by dialing “0” for the hospital operator.

TOURS & DRILLS

Hazards Surveillance Tours are conducted every 6 months in all patient care areas & annually in non-patient care areas. Fire Drills are conducted quarterly on all shifts in all areas. Mercy conducts a fire drill every month & each employee facility wide must respond. Disaster Drills are conducted twice per year. Medical Equipment is tested prior to use & at least annually thereafter.

SAFETY POLICIES

Safety policies are located on the intranet under policies/safety.
MEDICAL EQUIPMENT
When reporting a piece of medical equipment that requires repair, information included needs to be – name of person reporting, area & room number, equipment located in, equipment number, phone number & specific problem reported. Inspections, testing and maintaining equipment is done to minimize the clinical & physical risks to patients, care givers & staff. A safety sticker on the equipment means the equipment is “safe to use.”

REPORTING WORK RELATED INJURIES
All injuries, no matter how small that arise out of & in the course of employment should be reported. Steps in reporting an injury.
1. Notify Supervisor or person in charge.
4. Seek medical care if necessary at Mercy Business Health Services at 274-4250, M-F 8 to 8 p.m. or Mercy Medical Center ER for emergency care & off hours.

FIRE RESPONSE
Respiratory Care is responsible for closing of medical gas zone valves to areas in the event of a fire, if necessary.

EMPLOYEE HEALTH
Steps to take after a contaminated sharps or splash:
1. Cleanse area as appropriate.
2. Report to person in charge, so that you can be relieved of your current duties in order to go to the ER Trauma Dept. to begin your PEP treatment plan.
3. Take with you to ER information on who your source exposure/patient is.
4. Complete the PEP packet that you will receive in ER & forward it to Employee Health within 24 hours.
5. Also call Employee Health, 2053, & leave a voicemail message of your exposure.

If you are exposed to a communicable disease at home or at work, you should:

HAZARDOUS MATERIALS
To report a hazardous material spill you should contact your supervisor, environmental services or the safety officer who will initiate procedures for specific spills.

EMERGENCY PREPAREDNESS
Patients are moved away from windows to designated “safe” areas, designated by “sky warning” signs in corridors, whenever possible during a sky warning alert.

Each department or unit’s role in the event of a disaster plan is spelled out in the departmental disaster plan, (in your red Safety Manual).

UTILITY FAILURE
In the event of a utility systems failure call the Facilities Dept. at extension 2150 or Operator at 0, after 4:30 p.m. & on weekends - - - with the exception of communications telephone system, then call the operator at 0.
