What's Changed: Health care personnel (HCP) read and respond to pre-shift COVID-19 screening questions at facility entrances prior to entering any patient care area, clinic, or home setting.

**ENTRANCE SCREENING QUESTIONS**

Screening Healthcare Personnel (HCP), Providers, Colleagues, Volunteers, Students, and Vendors [*HCP* for purposes of this document] for the potential to transmit the SARS-CoV-2 (COVID-19) virus remains a top priority for Trinity Health. All HCP are required to review the COVID-19 questions below before they enter any Trinity Health location or represent Trinity Health in the community. Positive responses to any questions related to test results, symptoms, or high-risk exposures require the colleague to refrain from entering and seek further evaluation. The following questions must be reviewed each time you enter a Trinity Health location:

1. **Have you experienced any of the symptoms in the list below in the past 48 hours?**
   - Fever or chills
   - New or unexplained onset of cough
   - Shortness of breath, difficulty breathing, headache, severe throat congestion or runny nose, nausea or vomiting, diarrhea
   - New or unexplained loss of taste or smell
   - New or unexplained muscle aches

2. **Are you isolating because you tested positive for COVID-19 or are sick and suspect that you have COVID-19 but do not yet have test results?**

3. **Have you had unprotected close contact exposure* to an individual with COVID-19 in the last 10 days?**

If you answered YES to any of the questions:

**COLLEAGUES**
- Contact your Employee Health Administrator or designee for further instructions.

**PATIENTS & SUPPORT PERSONS**
- Proceed with hand hygiene and masking, please notify your care team of your symptoms.

**NON-PATIENTS, VISITORS, ETC.**
- Do not enter at this time. Please return when you are free from symptoms.

*Unprotected close contact exposure means prolonged, unprotected close contact (i.e., within 6 feet for 15 cumulative minutes or longer over a 24 hour period) with an asymptomatic patient with confirmed SARS-CoV-2 infection. For healthcare personnel unprotected close contact means being within 6 feet for 15 cumulative minutes over a 24 hour period when required PPE was not worn.
