Michigan Medicine Reciprocity Agreement Summary

University of Michigan Health System (UMHS), now called Michigan Medicine, is the preferred provider for enrolled Trinity Health colleagues and their eligible dependents that are employed at a Michigan-based ministry seeking care for advanced quaternary care not provided by Trinity Health facilities such as burn care, transplants and many pediatric specialties.

The following services at Michigan Medicine are covered as a Tier 1 / domestic provider level under the Trinity Health medical plans for colleagues of the Trinity Health Michigan-based ministries who are enrolled in a Trinity Health medical plan and their covered dependents:

- Pediatric Specialty Clinic referrals listed below, as amended from time to time.
- Unique Michigan Medicine Programs/Services listed below, as amended from time to time.
- Hospital-to-UM Hospital Inpatient Transfers.
- Emergency Room-to-Michigan Medicine Emergency Room transfers

Please note: Not all claims will automatically adjudicate at the Tier 1 level. Please review your Explanation of Benefits (EOBs) closely and reach out to BCBSM for any questions regarding your claims. Some services may require reprocessing.

### Exhibit A – UMHS Pediatrics Specialty Clinic Listing by Department

#### Pediatrics
- Behavioral Medicine Clinic
- Teenage and Young Adult Health Clinic
- Pediatric Psychology Clinic
- Pediatric Cardiology Clinic
- Pediatric Endocrinology Clinic
- Pediatric Gastroenterology Clinic
- Pediatric Genetics Clinic
- Pediatric Infectious Disease Clinic
- Pediatric Neonatal/Perinatal Medicine Clinic
- Pediatric Nephrology Clinic
- Pediatric Neurology Clinic
- Pediatric Neurology Sleep Disorders Clinic
- Pediatric Epilepsy Clinic
- Pulmonary Clinic Pediatric
- Pulmonary Function Lab Pediatric
- Pediatric Rheumatology Clinic

#### Otolaryngology
- Pediatric Otolaryngology Clinic

#### Dermatology
- Pediatric Dermatology Clinic

#### Ophthalmology
- Pediatric Ophthalmology and Strabismus Clinic

#### Surgery
- Pediatric Surgery Clinic
- Pediatric Comprehensive Weight Management Clinic
- Pediatric Colorectal Surgery Clinic
- Pediatric Surgery Clinic
- Pediatric Vascular Anomalies Clinic
- Pediatric Plastic Surgery Clinic

#### Urology
- Pediatric Urology Clinic

#### Psychiatry
- Pediatric Psychiatry Services

#### Cancer Center
- Hematology/Oncology Clinic Pediatric

#### Neurosurgery
- Pediatric Neurosurgery Clinic
Exhibit B - PROGRAMS/SERVICES UNIQUE TO UMHS

OVERALL
Solid-organ transplants
Bone marrow transplants
Pediatric subspecialty medical/surgical/psychiatric services
Survival Flight
ECMO for adult, pediatric and neonatal patients
Clinical Trials that are not offered at Trinity Health Michigan facilities

CANCER
MIBG treatment
Chimeric Antigen Receptor T Cell Therapy (CAR-T)

HEART/CARDIOVASCULAR/CARDIAC SURGERY
Pediatric ventricular assist devices and heart transplantation
Surgery for pediatric renovascular hypertension
Neurodevelopmental follow-up program for congenital heart patients
Adult congenital heart procedures
Pulmonary hypertension (advanced and experimental therapies)
Circulatory support with new mechanical devices and ECMO
Total artificial hearts for adults and children
Percutaneous repair of prosthetic mitral leaks
Genetic cardiovascular diagnoses
Complex VT ablation
Carotid stenting with flow reversal
Pulmonary thromboendarterectomy

NEUROSCIENCES
Surgical treatment for intractable epilepsy
Deep brain stimulation for Parkinson’s disease
Care of complex multiple sclerosis

OBSTETRICS AND GYNECOLOGY
Fetal Therapy
- CVS
- Patients needing fetal echo due to other risk factors
- Radiofrequency ablation
Management of transgender care
Michigan Bowel Control Program
Healthy Healing after Delivery Program
Vulvar Diseases Program (including complex surgical management of vulvar diseases)
Medical and Surgical Management of Chronic Pelvic Pain Complex patients to UM
Integrated/Multidisciplinary Management of Interstitial Cystitis

**OTOLARYNGOLOGY**
Cranial base surgery
Facial nerve reanimation/rehabilitation programs
Acoustic neuroma
Cochlear implants

**PEDIATRICS** – All UM pediatric specialty services are considered Tier 1
Pediatric Genetics, Metabolism and Genomic Medicine Program for children with congenital anomalies, autism, developmental delay and genetic syndromes
MMGL genetic test services, including chromosomal microarray, Fragile X DNA testing, genetic sequencing tests, methylation PCR, familial mutation testing, BRCA1/BRCA2 sequencing and deletion/duplication testing
Neonatal Therapeutic Hypothermia
Neonatal Peritoneal Dialysis
Infant/Pediatric Home Ventilation Program
Cardiovascular Genetics Services
Fetal Alcohol Syndrome diagnostic services
Fragile X Clinical services and diagnostic testing
Disorders of Sexual Development program Cancer genetics
Biomedical genetics care services for inborn errors of metabolism and newborn screen disorders
Comprehensive Pediatric and Adult Cystic Fibrosis Center
Multidisciplinary Clinic for Osteogenesis Imperfecta
Multidisciplinary Clinic for Pediatric Endocrine Surgical Disorders
Multidisciplinary Clinic for Prader-Willi Syndrome
Multidisciplinary Pediatric Sleep Disorder Program
Multidisciplinary Aerodigestive Program (ciliary disease)
Multidisciplinary Eosinophilic Esophagitis Program
Therapeutic joint injections for children with arthritis
Interdisciplinary Rheumatology-Nephrology Clinic to treat systemic inflammation such as lupus
Interdisciplinary Immunohematology Clinic for patients with immunodeficiency disorders
Gene Therapy for Spinal Muscular Atrophy (i.e. Zolgensma)
PHYSICAL MEDICINE AND REHABILITATION
 Pediatric ventilator-dependency services
 Pediatric brachial plexus injury care
 Selective dorsal rhizotomy for cerebral palsy
 Adults with Cerebral Palsy Clinic
 Post-Polio clinic

PSYCHIATRY
 Psychiatry Neuromodulation Program- including rTMS
 PsychOncology Clinic
 Psychiatry Infant/Early Childhood clinic
 Geropsychiatry Clinic

RADIOLOGY
 Neurointerventional radiology for intracranial aneurysms malformations and tumors

OTHER AREAS
 Dermatology Day Treatment Center for psoriasis and other inflammatory skin conditions
 PCDx test
 Level One burn center
 Level One pediatric trauma center and burn center
 Primary ciliary dyskinesia
 Aerodigestive clinic
 Bronchopulmonary dysplasia
 Treatment and prevention of neurological sports injuries
 Critical care membrane-based pheresis for sepsis with multisystem organ failure
 Disorders of sexual development
 Congenital adrenal hyperplasia
 Airway reconstruction
 Deaf Health Program (physicians and staff who communicate via sign language)
 Gene Therapy for confirmed biallelic RPE65 mutation associated retinal dystrophy (i.e. Luxturna)
