

Approaches to Building a Policy Assessment to Drive Decision-Making

By Samantha Hamilton

Desired Outcome

By the end of this session, you will have:

- A shared understanding of how Springfield TCI selects its PSE priorities through community feedback and policy assessments.
- Peer learning opportunities to explore strategies for conducting landscape assessments of policy approaches and identifying assessment needs.
- Examples of how coalitions and collaboratives can focus and narrow down their policy priorities.

Coalition's Assessment Process

Convened a diverse group of community partners and residents

Reviewed the hospital Community Health Needs Assessment (CHNA) and identified 13 topics to address health outcomes

Worked with the TCI
Advisory Committee
to narrow down to 4
topics to present to
the broader
community

Created a survey ranking tool and outreach to the broader community for feedback.

Used the community feedback to narrow down to Mental Health & Housing & Homelessness

Hosted key
informant
discussions to
deeper our
understanding of the
two issues

Participated in a root cause analysis and a narrowing exercise to determine the leading topic

Conducted a landscape analysis to determine the PSE approaches to address Housing
