

CORONAVIRUS DISEASE 2019 (COVID-19)

Approval to Utilize More Doses Per Vial of Pfizer-BioNTech Vaccine

Audience: Clinicians

Revision Date: 12/16/2020

Version: Version # 1

COVID-19 Response Team Owner: Clinical and Operations

Date of Last Review: 12/16/2020

Approval to Utilize More Doses Per Vial of Pfizer-BioNTech Vaccine

We now have confirmation from the Food and Drug Administration (FDA) that we can draw additional doses beyond the five (5) stated in Pfizer BioNTech COVID-19 Vaccine Emergency Use Authorization (EUA) from each reconstituted vial.

The FDA is working with Pfizer to modify its guidance. In the meantime, a sixth and even up to a seventh dose may be drawn from each vial, as long as it constitutes a full 0.3mL dose. UNDER NO CIRCUMSTANCES MAY THE REMAINING CONTENTS OF MULTIPLE DOSE VIALS BE COMBINED TO ACHIEVE A FULL 0.3mL DOSE.

We will work with operations to provide guidance on how to track this on the required vaccine logs.
